EisnerAmper Internal Audit Presentation

A. Internal Audit Update

- ii. Internal Audits Follow-Up**

Louisiana Board of Regents

Internal Audit Update

June 2025

Agenda

❖ Internal Audit Status Update

- BOR Human Resources Audit Results
- Follow-up Audit Status

Regents Human Resources Audit Results Overview

Objective & Scope

Internal audits were conducted of the human resources processes of the Board of Regents (Regents) listed below. This included separate audits of the internal processes performed at each program (Regents, LOSFA and LUMCON), as well as centralized processes performed at Regents.

- 1) Onboarding Process,
- 2) Pre-Employment Screening Process, and
- 3) Salary Determination Process.

The above scope areas were determined based on the results of our preliminary risk assessment and discussions with Regents, LOSFA, and LUMCON management.

Overview of Procedures

- Obtained and analyzed documented policies and procedures, organizational charts, job descriptions, HR-related reports, forms/templates, and recent audit reports;
- Conducted interviews and performed process walkthroughs with key personnel of internal processes at each program as well as centralized processes at Regents;
- Selected a sample of new hires during the period of July 1, 2024 through January 31, 2025 and performed testing to determine whether the in-scope processes were conducted in accordance with applicable policies and procedures;
- Identified and documented inconsistencies in related processes and documentation across each program

Regents Human Resources Observations Summary and Next Steps

Overall Observations Summary

- Through the performance of our procedures, observations and process inconsistencies were identified, all of which primarily derive from the lack of governance and formally documented, centralized policies and procedures governing all programs. This overall observation was assessed to be of high risk to the organization.
 - One specific observation and process inconsistency identified was a lack of defined and consistent pre-employment screening procedures across all programs, including a process for handling unfavorable screening results.

Details of low risk observations and all other process inconsistencies across the three programs were communicated to management.

Next Steps

- Obtain management responses
- Issue final report

Results Summary

Assessment Area	High Risk Observations	Moderate Risk Observations	Low Risk Observations
Regents Human Resources	1	1	0

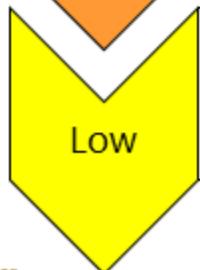

Risk ratings were assigned as follows:

- A serious weakness which exposes the organization to compliance risks in achieving objectives or may otherwise impair the organization's reputation. Generally, a high priority observation can include any of the following: non-compliance with a regulation or internal policy or procedure; or an operational inefficiency, resulting in a material expenditure.

- A control weakness, which can undermine the system of internal control and/or operational efficiency and should, therefore, be addressed.

- A weakness which does not seriously detract from the system of internal control and/or operational effectiveness/efficiency but which should nevertheless be addressed by management.

Follow-up Audit Status Update

Follow-up Audit Status Update

In addition to the audits included on the approved annual audit plan, EisnerAmper will also complete follow up audits of the observations identified during prior year audits and their corresponding management action plans.

<i>Auditable Area</i>	<i>Auditable Sub Areas</i>	<i>Auditable Activities</i>	<i>Status</i>
LUMCON	Information Technology	Security Processes	In Progress
LOSFA	Information Technology	Security Processes	In Progress
All Programs	Finance and Administration	LaCarte Procurement Card Program	In Wrap Up Phase

Agenda Item IV.
