## 2024 TASK FORCE RECOMMENDATIONS

Board of Regents (Higher Education)		Public Postsecondary System Management Boards (Higher Education)	
2024 Recommendation	November 2025 Status	2024 Recommendation	November 2025 Status
1. In collaboration with management boards, address policy barriers that hinder participation and access of (1) rural students, (2) underserved student populations, and (3) students with disabilities or exceptionalities.	Outreach and research in support of this recommendation are ongoing. (1) The 2023 Dual Enrollment Report shows rural schools exceeded the average participation rate by three percentage points. (2) Data on underserved populations are analyzed annually, with ongoing efforts to refine and expand this analysis. (3) A working group of disability services leaders will convene in Spring 2026 to develop a framework for better supporting students with disabilities.	1. Implement at scale the Universal Transfer Pathways that were recently adopted by Regents by increasing the consistency in degree requirements and course numbering for technical fields of study.	At this time 24 Universal Transfer Pathways providing 60 credit hours that can transfer to baccalaureate degrees have been adopted. Ongoing discussions continue related to system-wide alignment of technical pathways, degree program requirements, and course numbering.
2. Support statewide convenings of dual enrollment professionals to continue to promote the sharing of academic quality practices, address barriers to student participation and success, and strengthen advising and navigational supports provided to dual enrollment students.	Regents hosted two in-person convenings in Spring 2025 with the National Alliance for Concurrent Enrollment Partnerships (NACEP). By early Spring 2026, Regents will release a best practices toolkit targeted towards school counselors and dual enrollment coordinators.	2. Adopt and implement a universal higher education dual enrollment pricing structure.	No update at this time. A proposed uniform pricing structure was previously developed in coordination with the Board of Regents and Higher Education System Finance Officers. System specific discussions are continuing as is legislative advocacy.
3. Promote the implementation by postsecondary management boards of a universal higher education dual enrollment pricing structure.	No update at this time. A proposed uniform pricing structure was previously developed in coordination with the Board of Regents and Higher Education System Finance Officers. System specific discussions are continuing as is legislative advocacy.	3. In the upcoming 2024-2027 Perkins State Plan, LCTCS should identify avenues for increased investment of federal funds in technical dual enrollment and strengthen high school partnerships.	The 2024-25 Perkins State Plan continues the state's emphasis on aligning secondary to postsecondary technical programs of study, including quality metrics for postsecondary credential completion to which dual enrollment contributes. The plan includes a specific intention to expend state reserve funds to expand technical dual enrollment opportunities to rural areas of the state.
4. Monitor and promote institutional investment in staffing for dual enrollment and academic quality assurance practices such as faculty mentoring and development, curricular and assessment alignment, and evaluation.	Best practices in quality assurance were shared during NACEP workshops. Regents staff regularly engage in dialogue with institutional leaders about academic quality in dual enrollment.	4. Building on advising toolkits to be published by the Board of Regents and LDOE, modify and promote institution-specific advising toolkits for high school counselors and encourage institutions to expand navigation, advising and student supports provided to dual enrollment students.	By early Spring 2026, Regents will publish a best practices toolkit and encourage further distribution and adaptation by management boards.
5. Continue to invest in graduate programs designed for high school teachers to obtain the necessary credentials to teach dual enrollment and scholarships to promote equitable access.	Two institutions created new Regents-approved graduate certificate programs in Math (LSU A&M) and English (LSUS) designed for high school teachers to earn graduate credentials necessary to teach dual enrollment. Regents has provided funding to support tuition waivers to support up to 24 students.	5. Identify and support the removal of barriers that hinder dual enrollment participation and access for (1) rural students, (2) underserved student populations, and (3) students with disabilities or exceptionalities.	Outreach and research in support of this recommendation are ongoing. (1) The 2023 Dual Enrollment Report shows rural schools exceeded the average participation rate by three percentage points. (2) Data on underserved populations are analyzed annually, with ongoing efforts to refine and expand this analysis. (3) A working group of disability services leaders will convene in Spring 2026 to develop a framework for better supporting students with disabilities.
6. Encourage statewide collaboration among colleges and universities to utilize instructor credentialing standards that enable more instructors to teach entry-level college courses, including dual enrollment.	Dialogue with postsecondary leadership is anticipated to launch during the 2025-26 school year.
